Y-Rack (Wall)

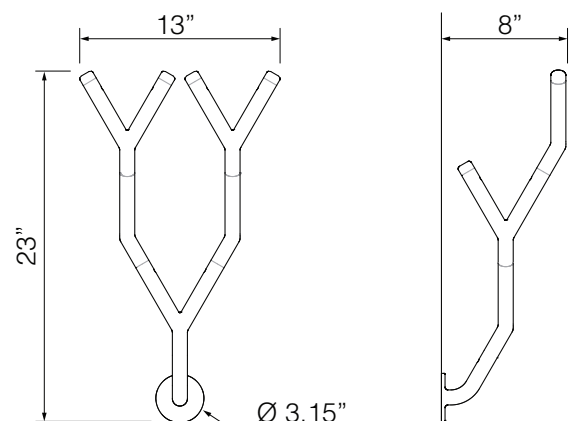

Designed by HCWD Studio for Hyfen

Y-Rack is a modular coat rack system which can be reassembled in numerous configurations from short to tall. It consists Y-shape modules, a center pole and a base or wall mounted base. The design is inspired by nature phenomenon that one splits in two such as cell division and tree branches. The overall form is influenced by traditional Taiwanese outdoor clothes dryer which has Y-shape sections for holding clothes and rods.

Materials: Stainless steel
